

# PG88 GPS Tracker Watch Manual

Patent products, counterfeit will investigate

**Patent no#:**201230361046.8

**Patent no#:**201230066090.6

# 1. Products Summary

## 1.1 Foreword

Welcome to use our GPS tracker watch, in order to help you know this products and operate the devices professional as soon as possible,we provide this detailed instruction manual with products,which include products introduction,usage method and notice,so that you can use the products function better.

## 1.2 GPS tracker watch functions

<ul style="list-style-type: none"><li>➤ GPS satellite and LBS location</li><li>➤ SOS emergency call</li><li>➤ Family number speedy dialing</li><li>➤ PC web real-time tracking</li><li>➤ SMS tracking location</li><li>➤ Geo-fence</li></ul>	<ul style="list-style-type: none"><li>➤ History playback</li><li>➤ remote monitoring</li><li>➤ Alarm clock</li><li>➤ MP3 music player</li></ul>
--	---

# 2. Technical specifications

Name	Parameter
Item	GPS tracker device
Battery Volt	3.7V
Charging Volt	DC5V
Watch Size	Outer Case Diameter:45MM / Thickness with battery17MM
Working Temperature	-20℃~+70℃
Storage Temperature	-40℃~+85℃
Working frequency	GSM 850/900/1800/1900 MH
Sensitivity	GSM -108dBm /GPRS CS4 -102dBm
Location query mode	PC platform, SMS, etc

# 3. Attention

Before using this GPS device, please notice the instructions as below:

- Make sure the SIM card is standard GSM network format,currentlly we don' t support 3G network
- Make sure the SIM card opened GPRS function,we suggest to use a GPRS packages(saving cost)
- Make sure the account of SIM card has enough money;

- Make sure the SIM card does not set a password (PIN1, etc.);

### **4.3.6 Clock Alarm**

Press confirm button into clock alarm menu, press confirm button to choose figures( hour, minute), pressing up/down to adjust the number, press return button to save and exit.

## 5. Set Command

There are two ways to set the commands.

First, download and install APK software to the android smart mobile phone. Please see the following instructions Method 1st. , The Second method is through SMS setting(5.16).

Note: Only need choose one method, cannot use both method at same time.

### **Method 1<sup>st</sup>:**

(5.1) Android os smart mobile phone----- Settings--Security-- “Unknown Sources” ,allow it .

<  Security

## Set up SIM card lock

### Passwords

**Make passwords visible**

### Device administration

## Device administrators

View or disable device administrators.

## Unknown sources

Allow installation of apps from sources other than the Play Store

### Credential storage

## Trusted credentials

Display trusted CA certificates.

## Install from device storage

Install certificates from storage.

## Clear credentials

Remove all certificates.

(5.2) APK software web,download from the web: [www.paxgps.com](http://www.paxgps.com)  
Or scan it from RQ Code.

(5.3) Add Device Management

## WatchInformation

Add

Click "ADD"

 **Adddevice**

Name	<input type="text" value="ZGPAX"/>
SIM	<input type="text" value="18824673047"/>
Watch Password	<input type="text" value="0000"/>

**Confirm** **Cancel**

For example:  
Fill in the watch name " ZGPAX", If you watch the phone number is 18824673047, default password is 0000 and press OK.

As showing:

WatchInformation

ZGPAX

Add

Open “ZGPAX”

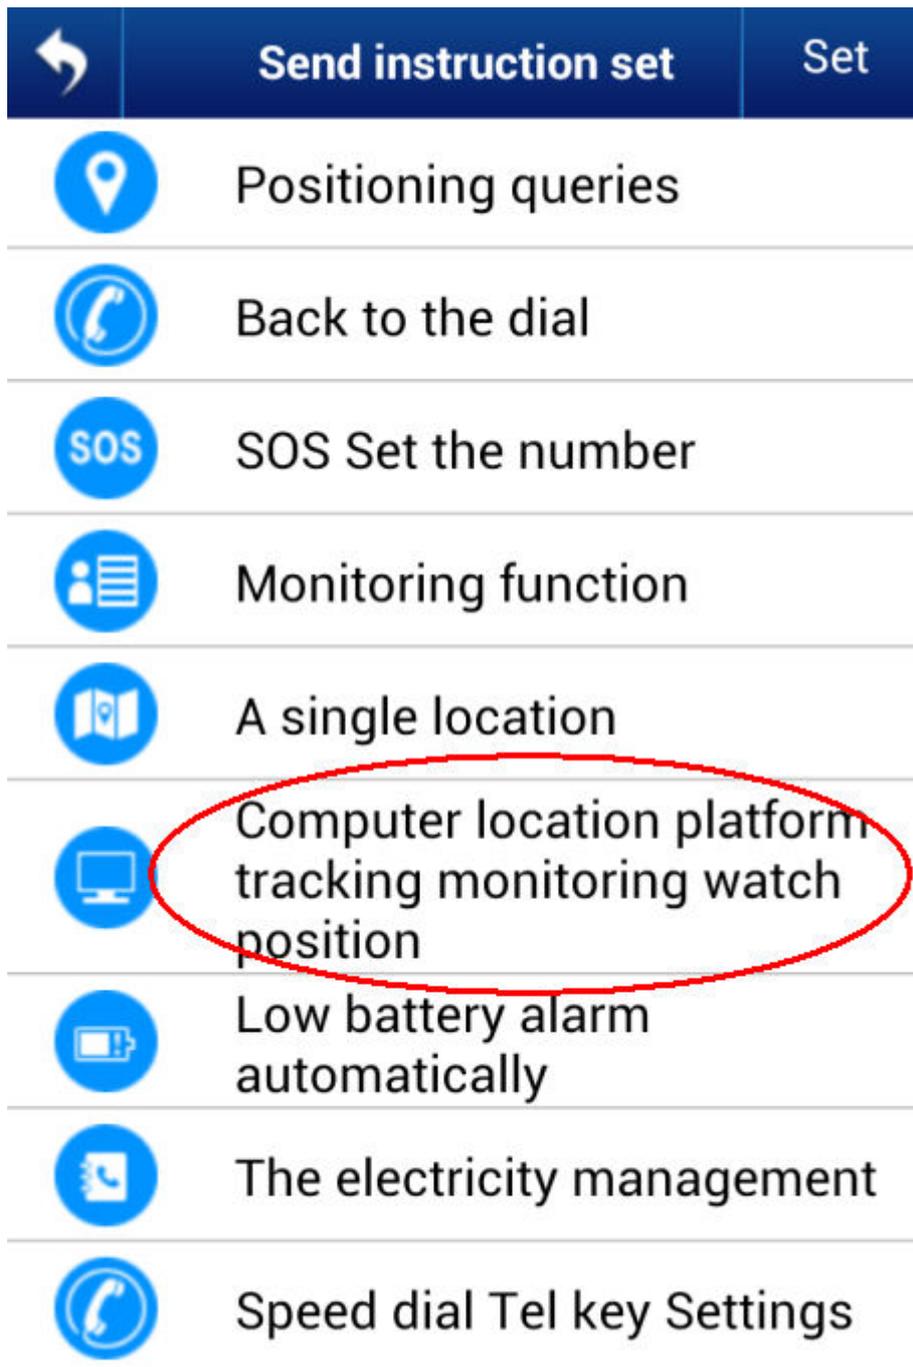

(5.4) SOS Setting

	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	Speed dial Tel key Settings	

The watch can set up three SOS numbers, 1SOS is admin number.  
 Eg: SOS number is 13800138000, direct input 13800138000 will be OK.

When the watch set up SOS numbers well, long press the SOS button will automatically dial 1SOS number. If 1SOS numbers do not answer the phone or reject a call, the watch will automatically give a call 2SOS number when 2SOS numbers do not answer the phone or reject phone, the watch will automatically give 3SOS number to call, this cycle three times. When the SOS number is not answered or the call is completed, the watch will automatically send: "SOS + current watch the latest location information" to SOS1 phone number.

### (5.5) Online platform tracking the watch's location

Update directly enter numbers can be, for example: 60 or 0, and then press OK.  
track 60seconds per time, 0 means turn off online platform tracking .

To save power, turn off the PC platform if no need this function.

If watch is "Off" and then "on " ,PC platform tracing is disabled by default.

Open the PC platform computer, platforms tracking URL [www.paxgps.com](http://www.paxgps.com)

Enter the login name: watch 15 IMEI numbers.

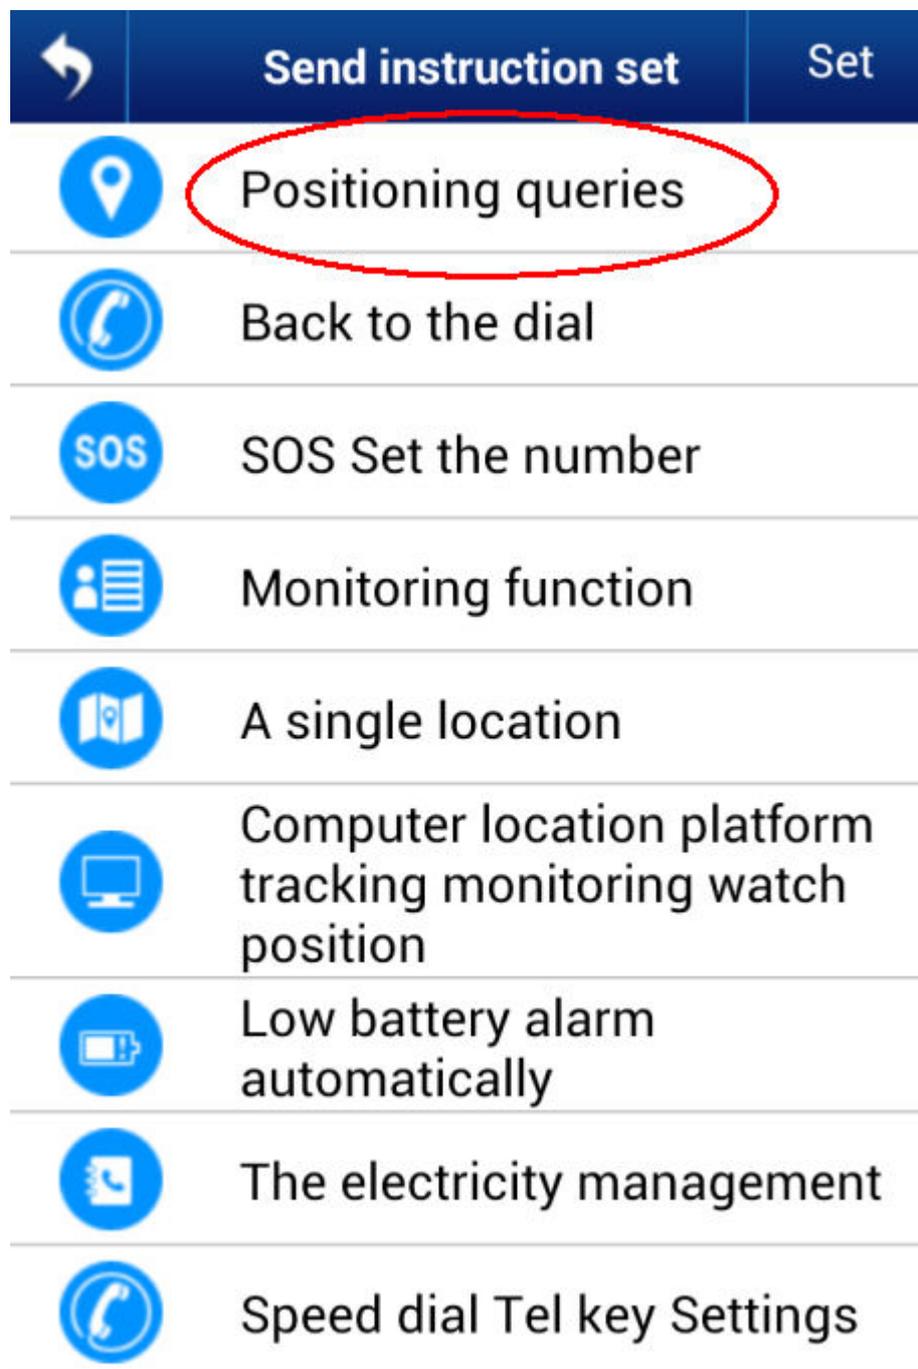

How to know right IMEI number:

1: there is IMEI sticker on the watch.

2: Open menu, long press Tel1 , can get it.

Default password : 123456

(5.6) Positioning query function (map link, need base on good GPS signals environment)

When watch get GPS signal, will reply a map link to SOS numbers,if no GPS signal will be LBS reply with text message.

(5.7) Call-back

	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	Speed dial Tel key Settings	

Watch automatically dials the number currently send SOS message, double-talk and call back after the watch.

**(5.7) Monitoring function**

←	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	Speed dial Tel key Settings	

Guardians can use this function to listen to the voice of nearby ward, but if the watch is locked, nothing happens.

**(5.8) Single Location**

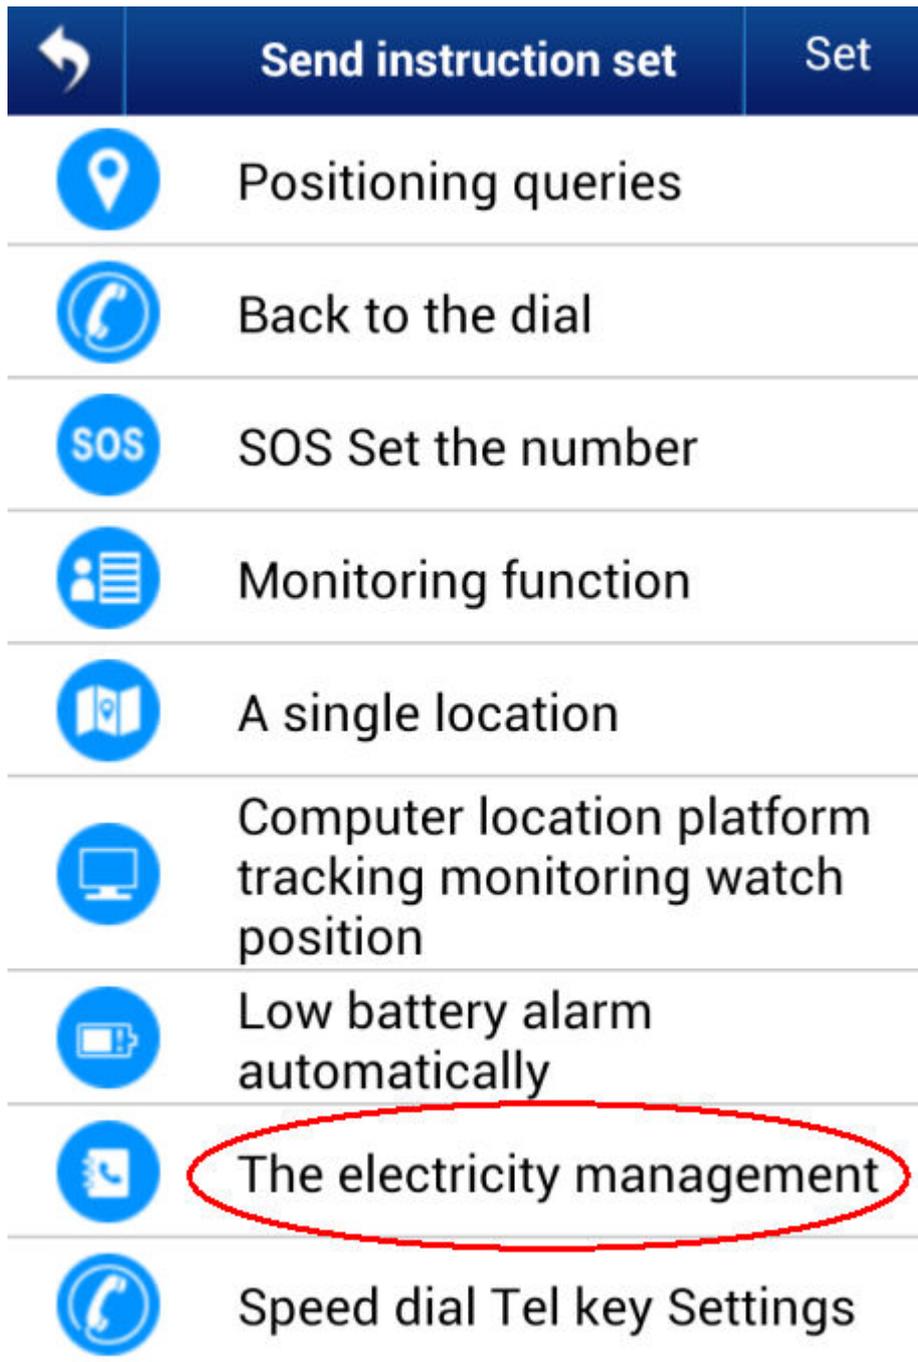

←	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	Speed dial Tel key Settings	

Positioning watch will send SMS reply location information about current ward's to SOS numbers automatically.

**(5.9) Low battery alarm**

	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	Speed dial Tel key Settings	

When the watch is low battery, it will reply a SMS: low battery to 1SOS numbers.  
**(5.10) Call Management**

On:

When get this command, Except Three SOS numbers can call the watch, any other numbers are impossible.

Off:

Allow all phone numbers call the watch.

**(5.11) TEL keys' fast dial settings**

	Send instruction set	Set
	Positioning queries	
	Back to the dial	
	SOS Set the number	
	Monitoring function	
	A single location	
	Computer location platform tracking monitoring watch position	
	Low battery alarm automatically	
	The electricity management	
	<b>Speed dial Tel key Settings</b>	

Eg:

Fill in the management software: 138XX138008 then click OK.

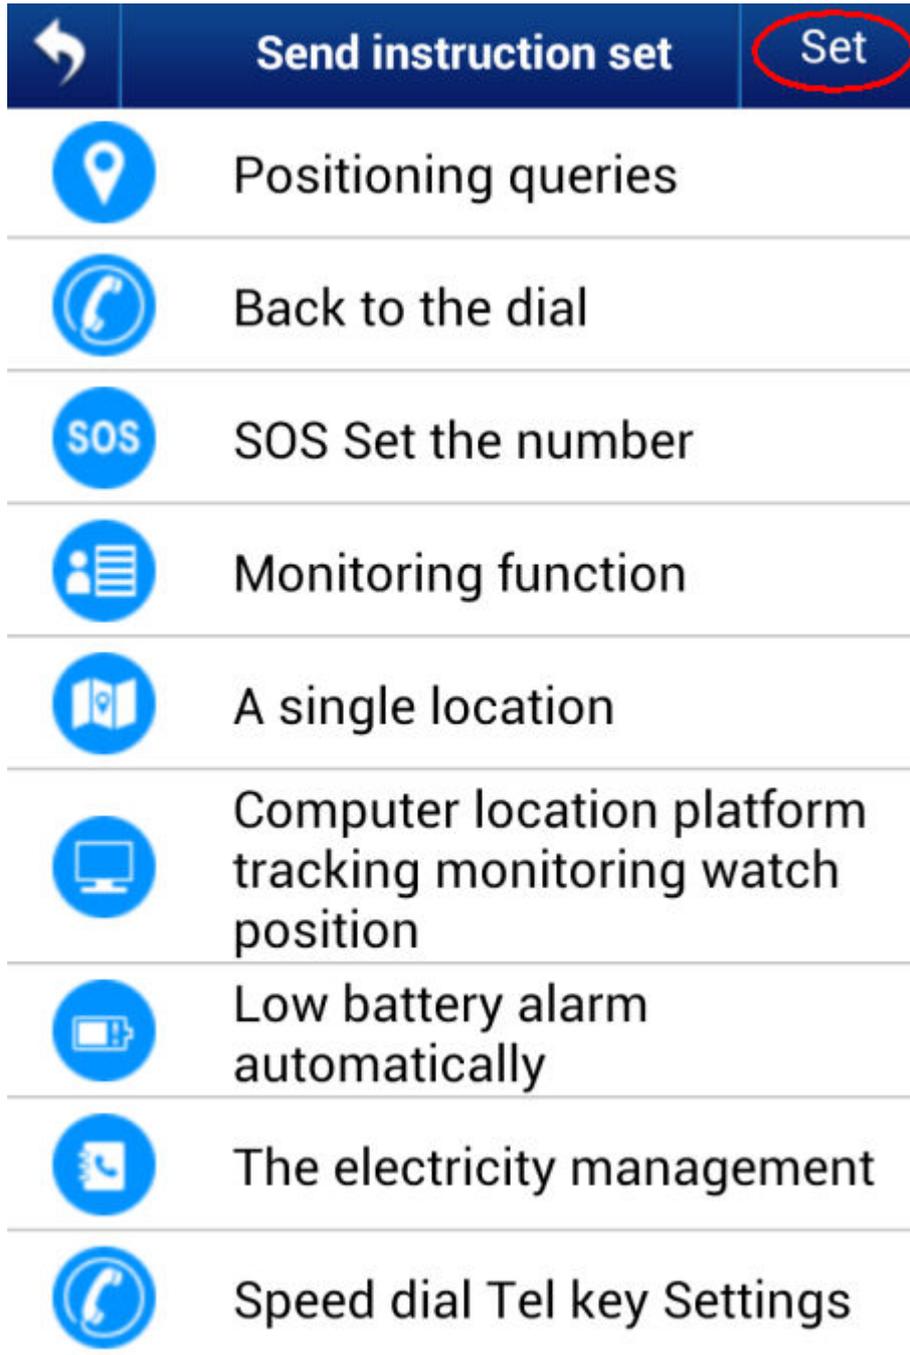

Reply: set TEL1 OK

Fill in the management software: 138XX138009 then click OK.

Reply: set TEL2 OK

As long press tel1 key, it will automatically dial watch 138XX138008, when long press tel2 key, it will automatically dial watch 138XX138009. (Need to press the TEL key upon standby interface)

**(5.12) Advanced Settings**

Open "Settings"

(5.13) Change watch's Password

## Watch set

### Watch general Settings

Watch the information

---

Change password watches

### Watch advanced Settings

APN Set

---

Restore the factory Settings

---

For example:

Click change watch's Password, write down new password: 1234, click ok.

Feedback : set psw ok!

The watch's password have amend to 1234. The default password is :0000,  
Only 1SOS phone NO. can change this password.

#### (5.14) Set APN

**Set APN is for the watch can send data to the platform by GPRS.**

China usually no need set apn, but many other countries and regions need Set APN.

About APN info the user can ask the telecom provider of the sim card in the watch.

## APN Set

Note: please do not arbitrarily change watch APN Settings, just try to use this feature when watch abnormal network connection.

Note: your current mobile phone number must be number send instructions will only be effective for administrator.

account:

connection:

username:

password:

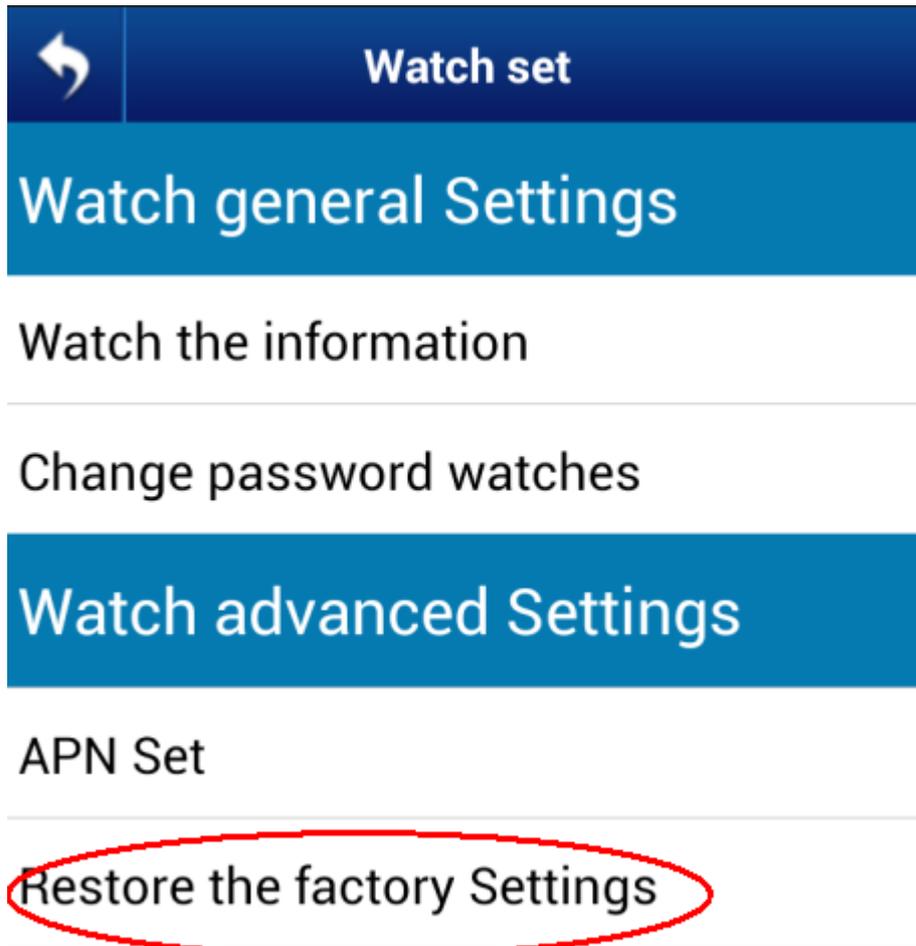

For example:

On this software, choose APN set, write down the correct APN info.

feedback: set apn ok!

Only 1SOS phone NO. can set and change this APN.

(5.15) Restore factory settings

This set will clear watch' s all settings, including user information, and so on.

**If you cannot use this apK software, please use the following message instruction to set the watch.**

**Method 2, SMS Settings**

**(5.16) Setting SOS phone numbers**

Format: **1SOS#0000#phone number**

**2SOS#0000#phone number**

**3SOS#0000#phone number**

Total can set three SOS phone numbers. "0000" is the default password of the watch. This password is very important, can change the SOS phone number in any normal phone when have this password. ( Change the password please see below: " 5.8 Change password".)

For example:

**Use the normal phone send SMS to the watch:**

**1SOS#0000#13800138000**

The watch will reply SMS: set 1SOS ok, then phone number 13800138000 will become the watch's 1SOS(admin)number.

**2SOS#0000#13800138001**

The watch will reply SMS : set 2SOS ok, then phone number 13800138001 will become the watch's 2SOS(guardian 1)number.

**3SOS#0000#13800138002**

The watch will reply SMS : set 3SOS ok, then phone number 13800138002 will become the watch's 3SOS(guardian 2)number.

**Also you can just set 1 or 2 SOS numbers.**

This SMS also can change the SOS phone number. Fox example:

**Use the normal phone send SMS to the watch:**

**1SOS#0000#13800138003**

**The 1SOS phone number of the watch will update to be 13800138003.**

After setting SOS phone numbers successfully, long time press SOS button of the tracking watch, it will auto call 1SOS phone number, when the 1SOS does not answer or refused to answer the calling, the tracking watch will auto call 2SOS, when 2SOS not answer or refused to answer the calling, the watch will auto call 3SOS. It will loop calling 3 times. After press SOS button, the watch will auto send a SMS : "SOS+detail address" to the 1SOS phone.. If long time press call off button, it will close SOS calling function.

Note: Below **all this SMS command must send by SOS phone number**

**(5.17) Get tracking link of position**

Use any SOS phone number send this SMS to the watch:

**SMS format: 01**

This command need the watch outside and can get the GPS signal.

If have GPS signal will reply a map link SMS to SOS phone NO.

**If not have GPS signal, the watch will auto use LBS model for tracking, reply LBS detail address SMS.**

**LBS:** Location Based Service, tracking by base station via GRPS.

**(5.18) Call back function**

Use any SOS phone number send this SMS to the watch:

**SMS format: 02**

the watch will auto call back to this sos phone number to have a two-way conversation(can talk with each other).

**(5.19) Listen function**

Use any SOS phone number send this SMS to the watch:

### **SMS format: 03**

☞ After send out this SMS, the watch will call back to this SOS phone number automatically to have a one-way conversation. This SOS phone can monitor the sound around the watch, but the watch can not hear any sound. The watch is auto locked (all buttons and screen failure and no response.)

#### **(5.20) Low battery automatic alarm**

Use any SOS phone number send this SMS to the watch:

#### **SMS format: 04**

#### **Feedback message: set low battery ok!**

When the watch show low battery, there will be a message sent to **1SOS phone number** automatically.

#### **(5.21) Single time get watch's position**

After APN set successful, you can use any SOS phone number send this SMS to the watch:

#### **SMS format: 05**

The Watch will reply the detail position with street name to this SOS phone number by SMS.

#### **(5.22) Set tracking on website in real time**

Use any SOS phone number send this SMS to the watch:

#### **SMS format: 08# interval time(seconds)**

For example:Send the SMS to the watch: **08#60**

Feedback message: set 08 OK

60 is the interval time, means every 60 seconds the watch will update the position data on website.

This SMS command will let the GPS always working, the battery will running fast, if no need see the website tracking in real time, please shut off this function to save the battery.

#### **Send this SMS to shut off this function: 08#0**

Feedback message : set off

**And every time turn off the watch, need resend this SMS to get real time tracking if need this function(to save battery purpose)**

#### **(5.23) Password change**

Format: 066#old password#new password

#### **SOS Number send SMS to watch, for example: 066#0000#1234**

Feedback: set psw ok!

Password changed to:1234. Default password is 0000. Only 1SOS can set and change this command

**(5.24)** Set APN (No need to set APN in china, But in HK , Taiwan, foreign country should set the local service APN)

Format:06#0000#account name#Access Point Name#user name#user password

**1SOS send SMS to the watch, for example:**

**06#0000#chana wap#cmwap#hhh#123**

Feedback:: set apn ok!

Only 1SOS can set and change this command

### **(5.25) Call Management**

SOS numbers send SMS to watch for example:: **77**

When the watch receive this command, any other numbers cannot call except the three SOS numbers can call the watch

SOS numbers send SMS to watch for example: **99**

Allow all the normal phone numbers call the watch

### **(5.26)“Tel button” fast dial function and setting**

Format: TEL1# TEL NUMBER

TEL2#TEL NUMBER

**Normal mobile send sms to the watch, for example: TEL#138xx138008**

Feedback: set TEL1 OK

**Normal mobile send sms to the watch, for example: TEL2#138xx138009**

Feedback: set TEL2 OK

When long press tel1 button , the watch will dial 138xx138008 directly, when long press tel2 button, the watch will dial 138xx138009

### **(5.27) Restore factory setting**

1SS send sms to the watch, for example: 77#99#0000

Then clean all setting include user informations and so on

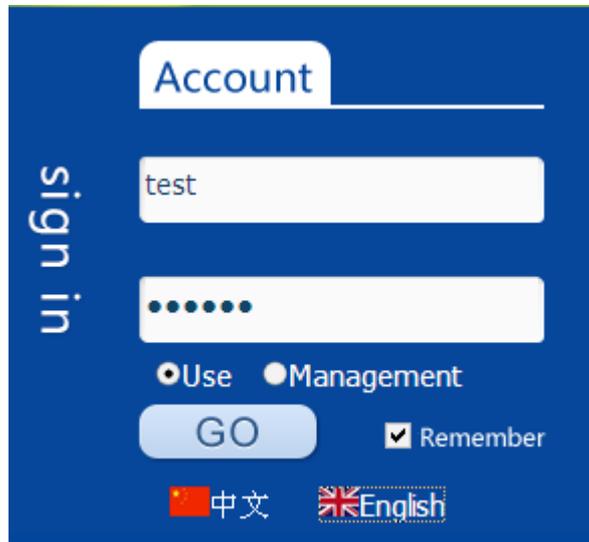

## **6. PC-WEB service platform**

### **6.1 Login**

Login the WEB of the service platform---- [www.paxgps.com](http://www.paxgps.com) with a user name, password, click "GO" to enter the platform interface.

The user name is the IMEI code of the watch (Method 1: watch IMEI number is attached to the watch behind with 15 digitals, Method 2: In the menu interface, long press the down key to view the IMEI number)

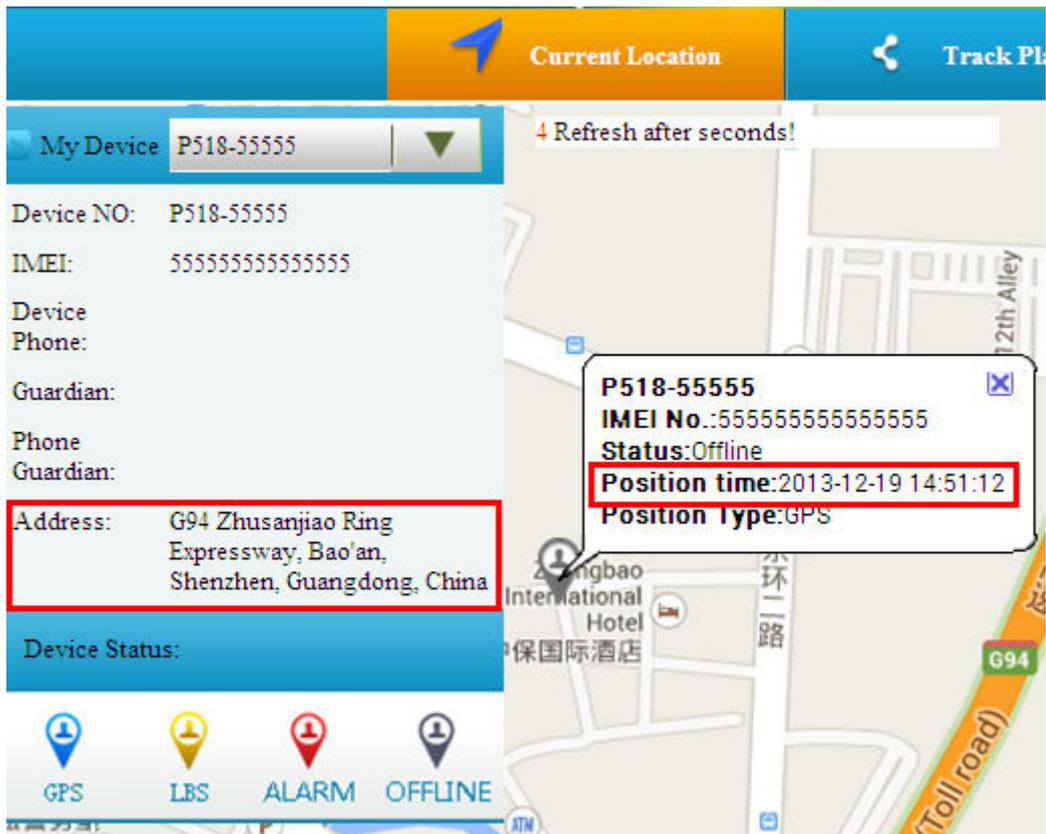

Default password: 123456, you can change it on website.

## 6.2 Current location(need to set the SOS number and platform tracking function)

Search the tracker name in the left equipment list, it will list the target updating position.

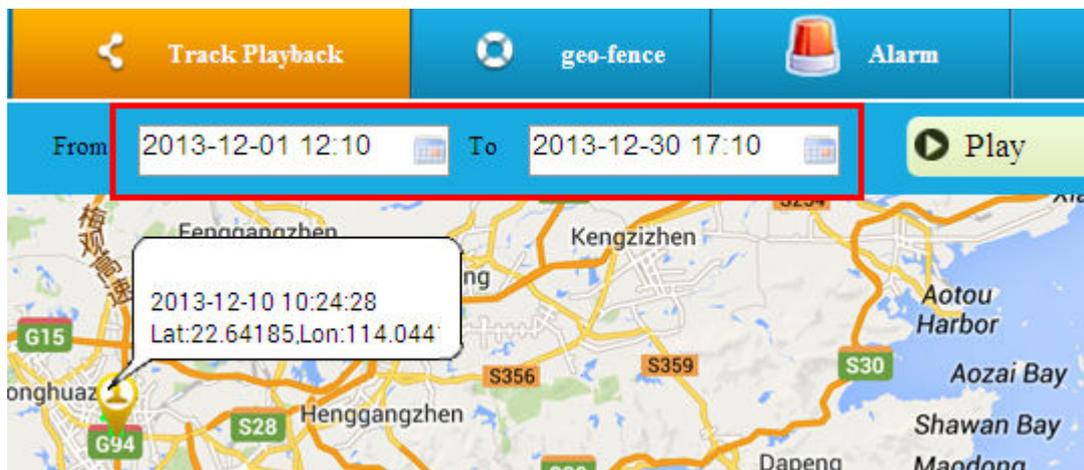

Tracking online

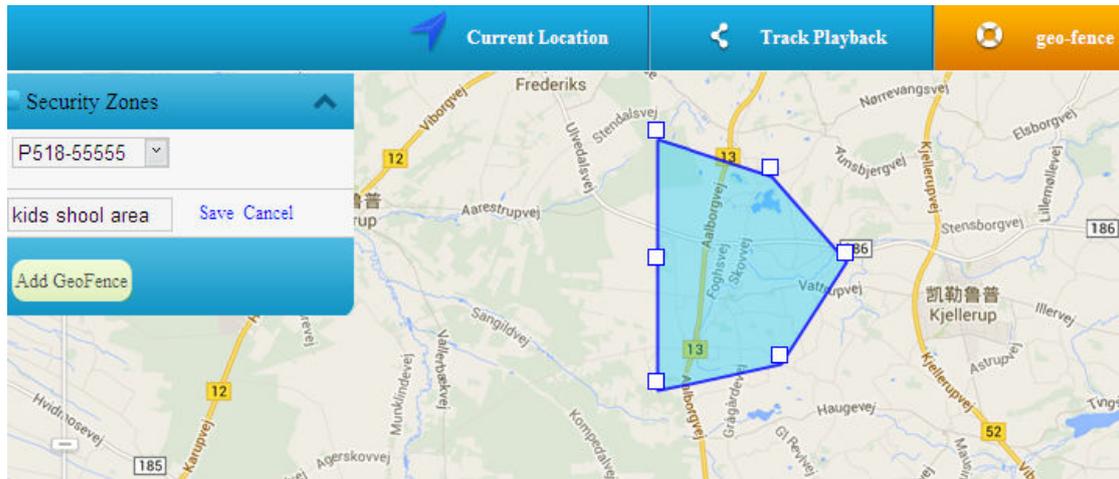

### 6.3 Historical track playback

Click the icon to view the detailed position and tracking time

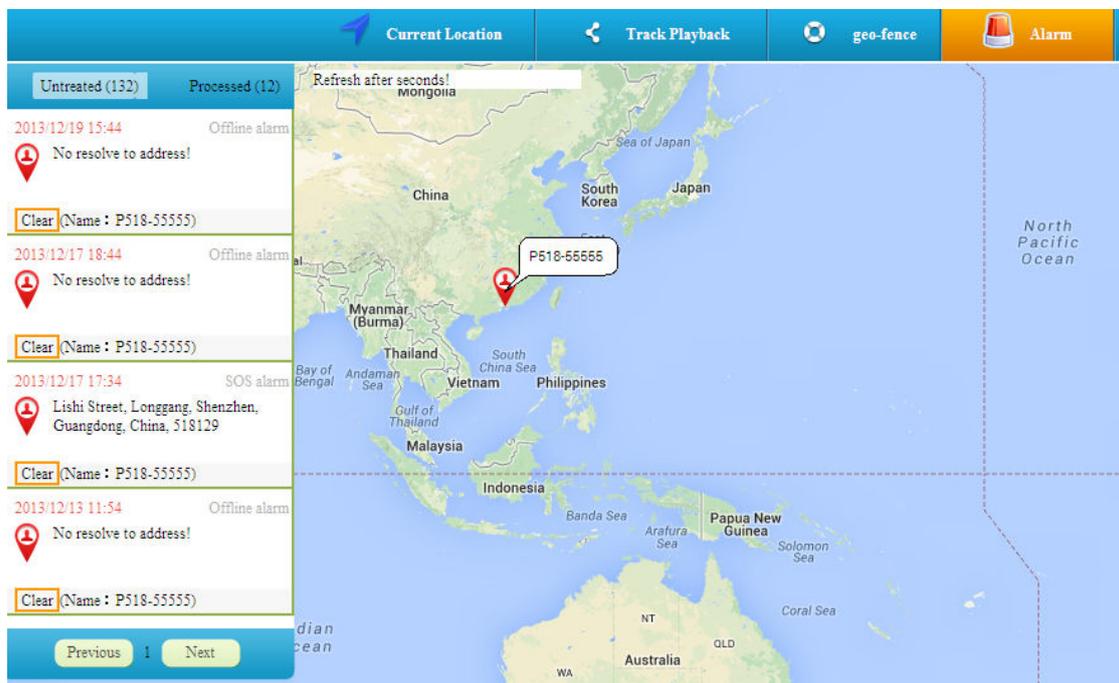

Track Play back

## 6.4. GEO-FENCE

Click the "new electronic fence" button on the top left corner. There will be a circular fence area display as the figure, the size range of electronic fence can be selected by dragging edge of any shape region, platform will alarm when watch is beyond the fence area.

## 6.5. Platform alarms

Click "message" menu on the top right corner of map to check all alarms.

## 7. Phone tracking platform

(7.1) Select Android smart phone “Unknown sources”

<  Security

## Set up SIM card lock

### Passwords

**Make passwords visible**

### Device administration

## Device administrators

View or disable device administrators.

## Unknown sources

Allow installation of apps from sources other than the Play Store

### Credential storage

## Trusted credentials

Display trusted CA certificates.

## Install from device storage

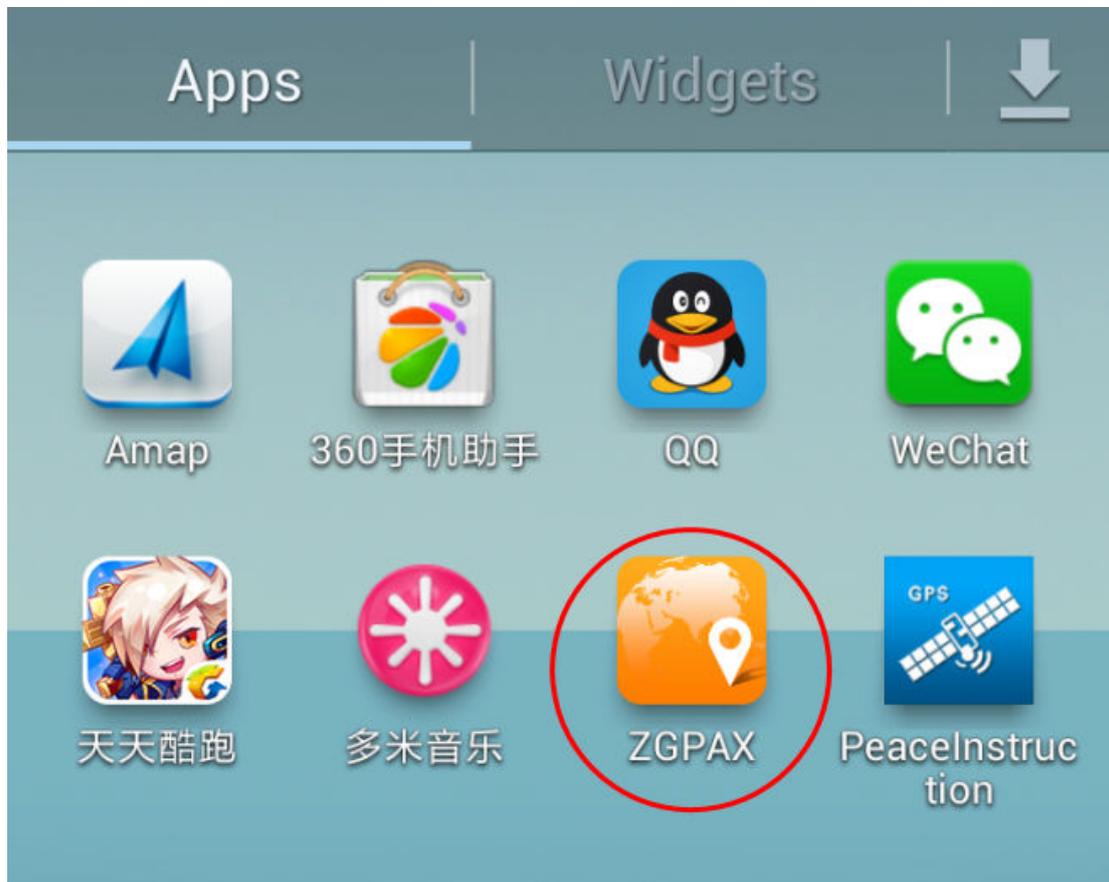

Install certificates from storage.

## Clear credentials

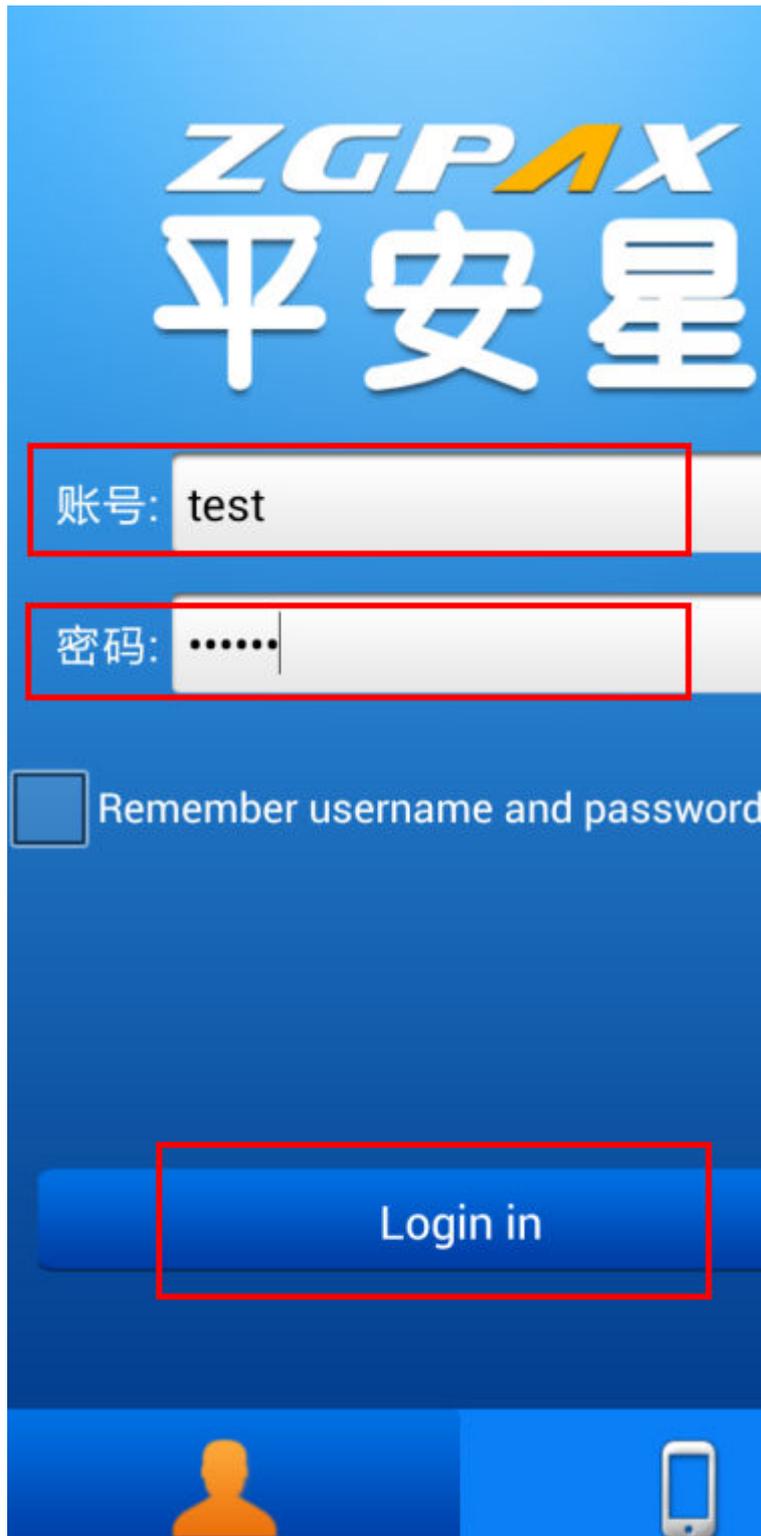

Remove all certificates.

In the android smart phone—setting—security— “Unknown sources” , shown as the picture

(7.2) Software download address : [www.paxgps.com](http://www.paxgps.com) into the website and click the watch mobile terminal to download and install, or scan the QR code to download to the phone

(7.3) Open and login into the platform in smart phone

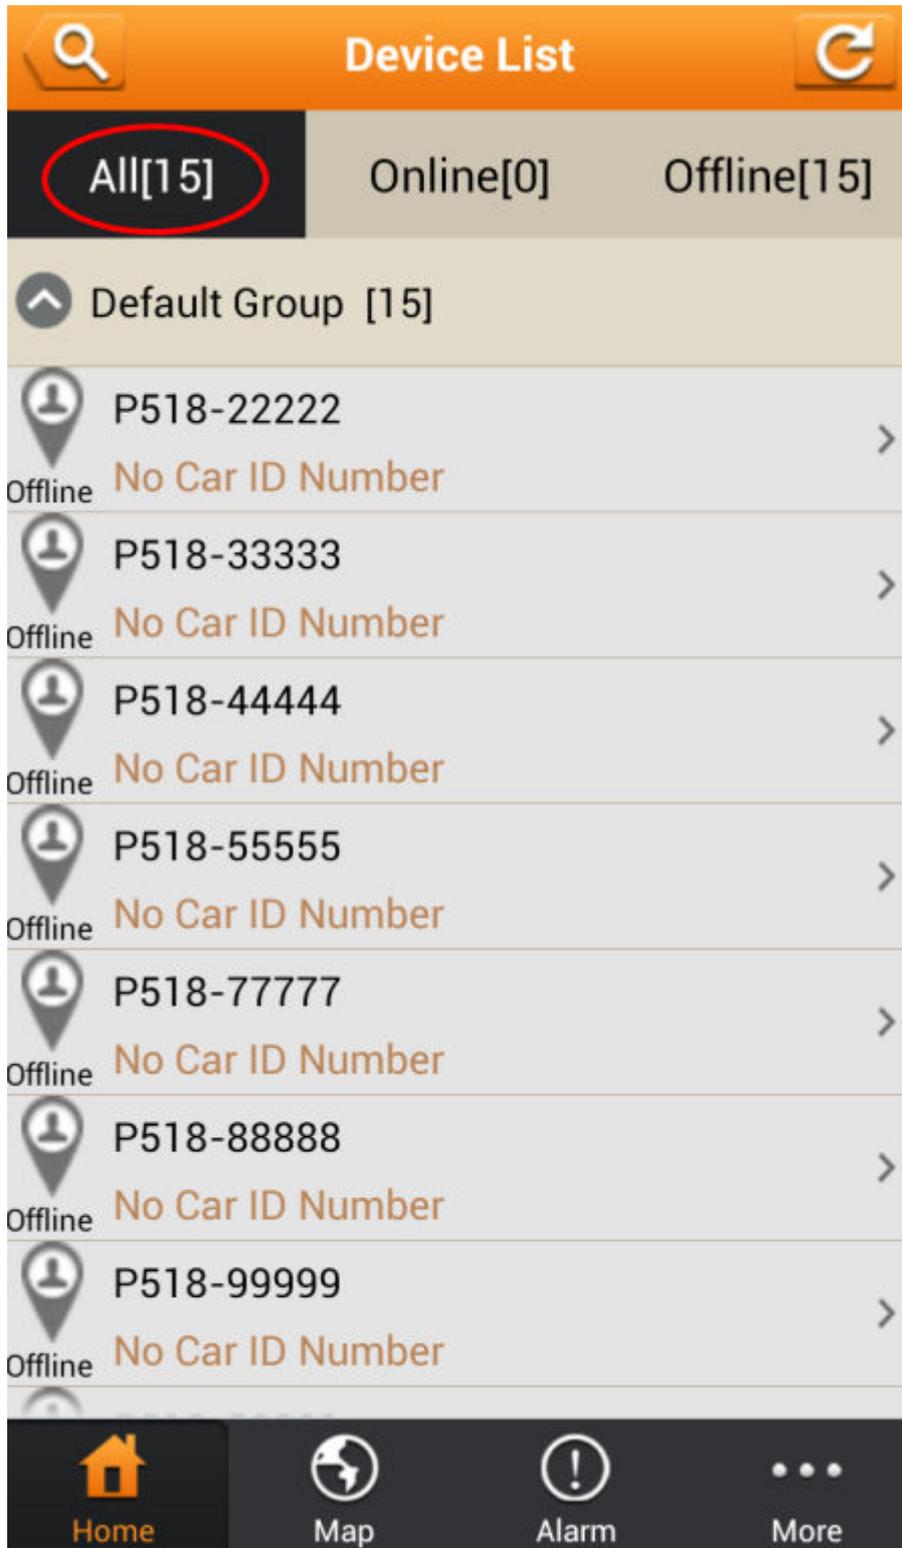

Insert the Account and password to login

The user name is the IMEI code of the watch (Method 1: watch IMEI number is attached to the watch behind with 15 digits, Method 2: In the menu interface, long press the down key to view the IMEI number)

Default password: 123456, you can change it on website.

(7.4) Tracking list

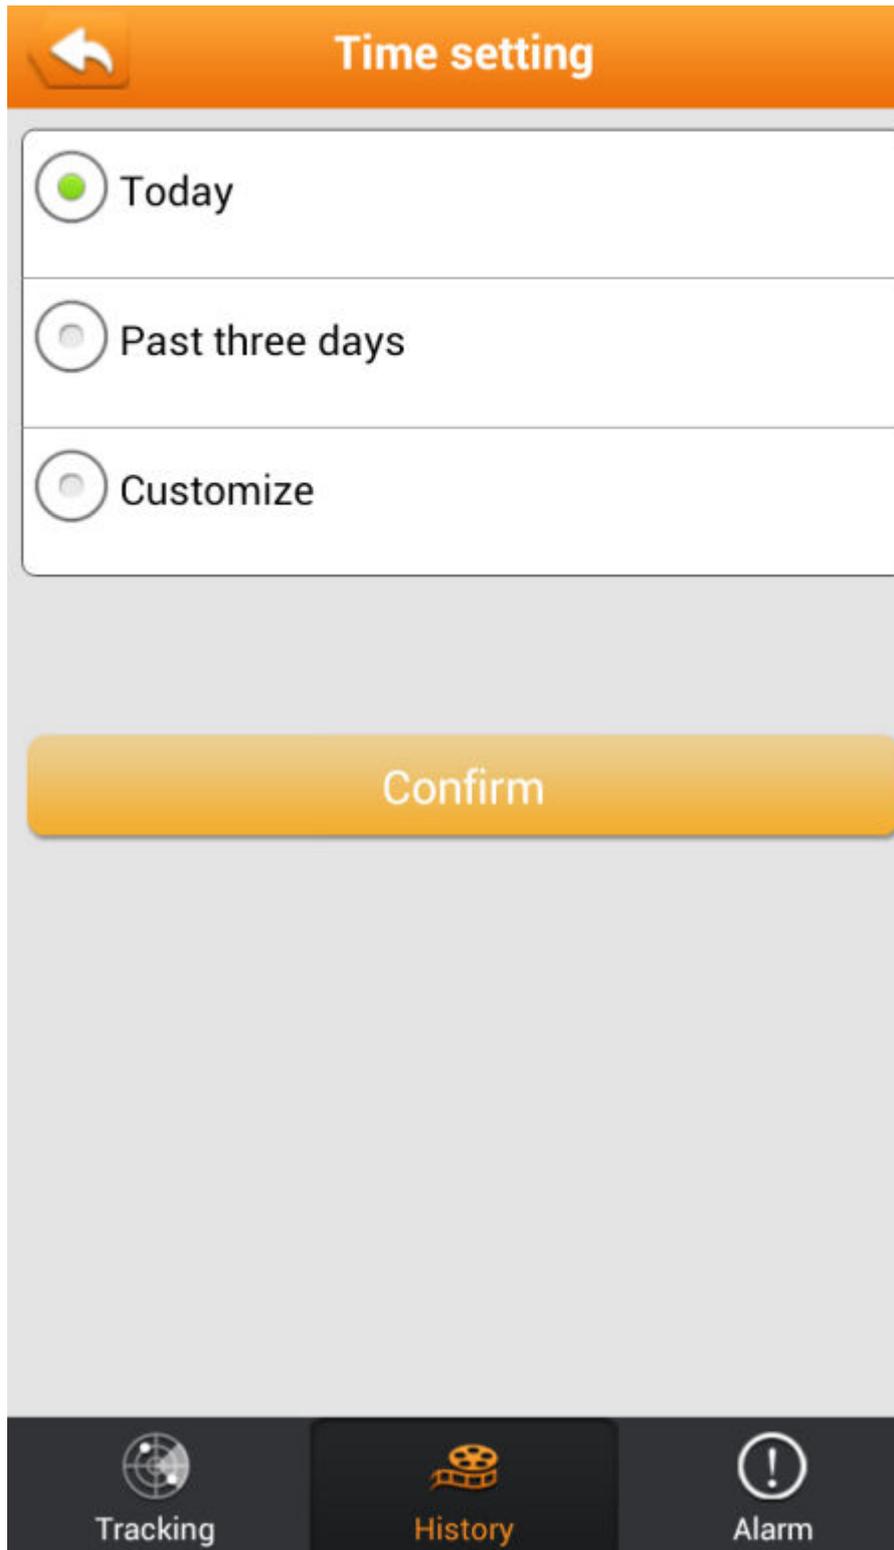

Check the watch status “all ” “online” “offline”

(7.5) Real-time tracking (Set SOS number and platform tracking function)

(7.6) Playback list

(7.7) Alarm message
